Career and Health: Personal Attributes

Purposes:
To review the personality-traits vocabulary that we learned last lesson
To co-operatively plan an imaginary event
To identify employability skills that are related to our personal attributes
To introduce the E-Portfolio assignment

Vocabulary Review

• Review the vocabulary that was introduced on the initial personal attributes test sheet by finding a word that is related to each of the following:

Clue	Words
Two words that are similar to "energetic"	
Two words that are similar to "caring"	
Two words that refer to **not** needing a plan	
Two words that are similar to "friendly"	
Two words that are similar to "smart"	
Two words that are similar to "active"	
Two words that are similar to "questioning"	
Write your clue below and quiz 1 student	Write the answer to your clue below

Event Planning

• The next task is to flip over your poster and **plan an event** on the other side. Each group should come up with a plan for a school Hallowe'en Party. You will have 20 minutes to come up with this plan and then present it to the class.
• **Reflect** on how the plans were different and why this might be the case.

Employability Skills - The skills that make companies want to hire you

• Take out your Macbook and go to this link:

http://www.kent.ac.uk/careers/sk/top-ten-skills.htm

• View Kent Universities "Top Ten Employability Skills"

• Which of the skills are the most pronounced for each "colour"?

Gold	Orange	Blue	Green

Using these ideas, which of your personality traits make you employable? Explain.

Introducing the E-Portfolio Project

Your year-long goal in Career and Health will be to produce a high quality E-Portfolio that will showcase your academic and co-curricular achievements and describe you as a student. Your C&H teacher will give you small assignments throughout the term and the year and by June you will have put together a quality snapshot of your year at BCC. The first task is to set up an e-portfolio on Google Sites. View the following presentation to get started.

www.slideshare.net/lchow23/using-google-sites-to-create-an-eportfolio

View the presentation and then sign in to Google Sites to experiment
